Nick Fourtounis

Student at University of the Aegean

nickfortune@windowslive.com

Summary

I am an undergraduate student at the Department of Information & Communication Systems Engineering of the University of the Aegean in Greece. So far I have taken lessons about programming languages and techniques, communication systems and hardware knowledge. Moreover, I have worked/ still working, on side projects, such as Aegean Robotics, Aegean Robotics website and more.

Experience

Aegean Robotics Site at   Aegean Robotics

July 2016 - Present (8 months)

   Currenlty developing the official site of the aegean robotics, the robotic team of the ICSD of the University of the Aegean. The site is made with joomla.

Certifications

Microsotf Student Guru UotA

student guru UotA   October 2015

Robotic School

University of the Aegean   July 2015

Education

University of the Aegean

Computer Engineering, 2013 - 2018

Activities and Societies: AI lab - http://icsdweb.aegean.gr/project/aegeanrobotics/

4th High School of Serres - Greece

Skills & Expertise

C++
C
C#
Java
XML
Databases
HTML
PL/SQL
MSQL
Unity

JSP
Servlets
PHP
Linux
ASP.NET
Computer Science
JavaScript
SQL
Web Development

Languages

English	(Professional working proficiency)
Greek	(Native or bilingual proficiency)

Projects

SkipBo

January 2016 to Present

Members:Nick Fourtounis

My personal implementaion for the famous card game "Skip Bo". Project Developed for the Lesson Object Oriented Programming II - Java of the Dept. of Information and Communication Systems Engineering of the UotA.

Website executing database queries.

December 2015 to Present

Members:Nick Fourtounis

Website executing database query for the needs of lesson Database II of the Dept. of Information and Communication Systems Engineering of the UotA.

Interactive Robotic Hand

Members:Nick Fourtounis

Interactive Robotic Hand conected to a glove with attached sensors to recognize your hands every move and instantly copy it.

Aegean Robotics Site

July 2016 to Present

Members:Nick Fourtounis

Currenlty developing the official site of the aegean robotics, the robotic team of the ICSD of the University of the Aegean. The site is made with joomla.

TrackMeIfYouCanChat

October 2016 to November 2016

Members:Nick Fourtounis, George Zervas, Pavlos Skoupras

Implementation of a messaging application through encrypted and anonymous channel. Clients Connect to the server via TLS protocol, so the server can have a list of the active users. Server service the list to all enlisted clients, therefore they can communicate with each other via I2P. The project was a part of the

course Conputer Network Security and Privacy Protection Technologies of the Dept. of Information and Communication Systems Engineering of the UotA.
